

## Microsoft Dynamics 365 Finance Consultant - Senior

OnActuate is looking for a full-time Microsoft Dynamics 365 Finance Senior Consultant to work in partnership with our clients, advising on how to use Microsoft Dynamics 365 (D365) to meet their business objectives.

**Location:** US and Canada, with ability to travel

**Key responsibilities include, but are not limited to:**

- Translate functional business requirements into a D365 application configuration design
- Provide clear and articulate documentation for all phases of the D365 implementation lifecycle
- Train clients on the use of D365 and any add-on software implemented by company
- Guide and support clients with User Acceptance testing solutions
- Collaborate with clients to develop functional designs for custom D365 requirements
- Configure and test D365 module configurations to ensure delivered solutions meet client's functional requirements
- Provide support and quality assurance for delivered D365 solutions
- Liaise closely with team to ensure high-quality, professional and client-focused solutions are always delivered
- Responsible for conducting peer reviews for D365 application configuration design and adherence to best practices, standards, procedures and methodologies
- Responsible for providing analysis and follow-up of Applications Support Service Desk items to ensure problems are resolved and bottlenecks reported to company management
- Demonstrate D365 to prospects and customers including preparation and requirements gathering prior to presentation
- Demonstrate company IP to prospects and customers across the globe, this sometimes requires flexible working hours
- Undertake any other responsibilities as deemed suitable by company's management
- Several years of progressive experience with D365 - In-depth knowledge of the Finance or Distribution modules is a requirement
- High level of understanding of business areas such as accounting, costing, job costing, etc
- Certified in D365 Finance & Operations

- Knowledge and experience with a recognized implementation methodology such as Sure Step from Microsoft
- Strong and demonstrable project management skills
- Several years of implementation experience with D365 software
- Effective business analysis skills in understanding client needs and delivering appropriate solutions
- Ability to work with client staff at any level
- Ability to work independently in a high-paced environment
- Ensures customer satisfaction and adherence to methodology
- Maintains productive and successful client relationships
- Meeting and exceeding customer expectations of business knowledge, skills, and behavior
- Ability to identify business/project risk and mitigate or communicate, as necessary
- Participate in pre-sales activities as requested
- Mentor junior team members
- Working experience of integration with third party applications
- Knowledge of LCS and its tool to manage the D365F&Sc environments.
- Knowledge of Azure DevOps to maintain the version control and deployment of the package from one environment to another

**Qualifications:**

- 10-15 years of experience required
- Working experience on Finance, Trade and Logistics, Warehouse, Inventory and Manufacturing Module configurations.
- Must have experience in pre-sales activities, implementations, configurations, design, gap fit and other ERP rollout functions
- Accounting/Finance certification is an asset
- Must have participated in 3+ end-to-end Microsoft Dynamics AX ERP or Dynamics 365 Finance and Operations implementations
- Crisp and clear communication style skills is a must have
- “Can-do” and a positive attitude is vital
- Deep technical and process level knowledge demonstrated experience in your career.
